How much impact will your donation make?

With \$50 a month for an entire year, you give one student two sets of school uniforms and the necessary books, a backpack, school supplies, as well as an entire year of healthcare protection, including a bimonthly visit to our Clinic, medicine as needed, nutritional assistance with vitamins and supplements, and vaccines.

With \$100 a month, you give 10 people with diabetes the opportunity to join our Diabetics Club and make sure they receive the education, nutritional guidance and follow-up treatment urgently needed to improve their quality of life.

With \$200 a month, you provide 20 families with access to clean drinking water, which prevents severe issues commonly caused by contaminated water such as diarrhea, birth defects, cancer, typhoid fever and cholera.

With \$500 a month, you give 10 families the possibility to start organic gardens in their own backyards – providing the necessary supplies and seeds, as well as some valuable training in basic gardening, soil enhancement, nutrition and natural pest control.
